SHOUXINGCARE

LET'S CUSTOMIZE

Tell AI what it needs to know about you

Voice

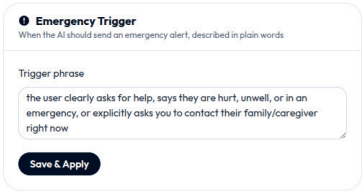

- You can choose how AI should sound with 10 different voice types.

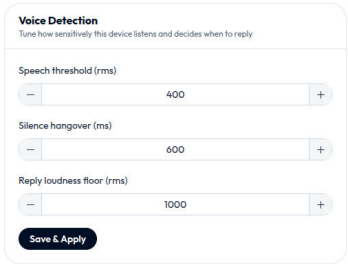

User Precondition Prompt

- Information about you; this device cares for (medications, conditions, daily habits) is managed here.

When AI should send alerts

Describe when the AI should send an emergency alert like if you ask for help, feel unwell, or want to contact family.

How sensitively the device should detect

Speech threshold

- Sets how loud someone needs to speak before the device starts listening.

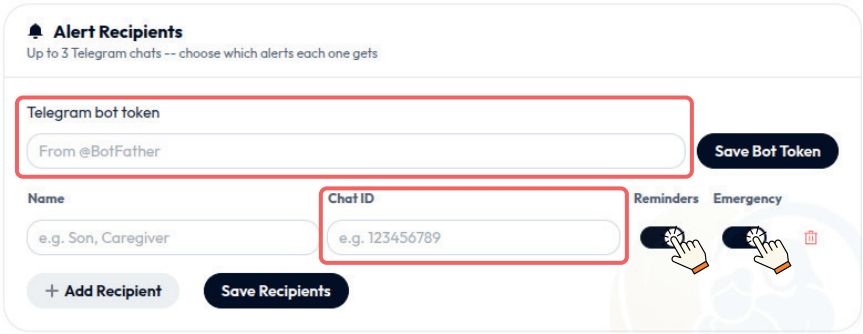

Silence hangover (milisecond)

- Controls how long the device waits after someone stops speaking before it decides to answer.

Reply loudness floor

- Sets the minimum volume for the AI's response so it is always clear and easy to hear.

WHO WILL RECEIVE THE ALERTS?

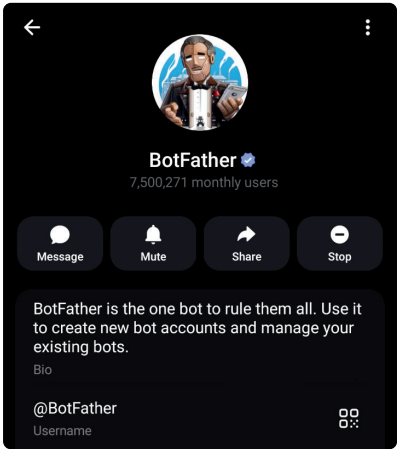

Setting up the alert recipients

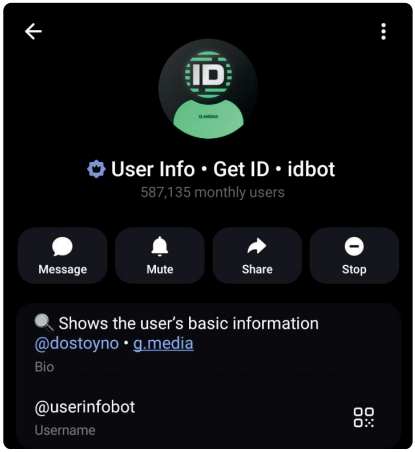

Reminders & Emergency Toggle Buttons

- Turn these on or off to choose which alerts each person receives (such as daily reminders or urgent emergency calls).

Telegram bot token & Chat ID

- These are important steps to get alerts reach the right phone.
- First of all, search the following 2 bots in your phone.

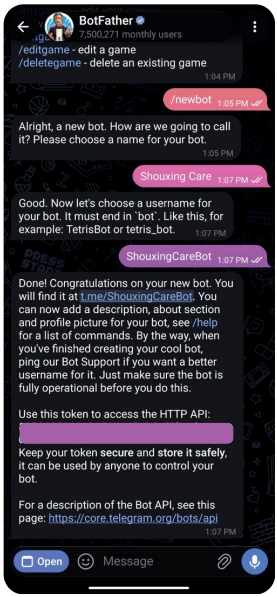

TRIAL VERSION

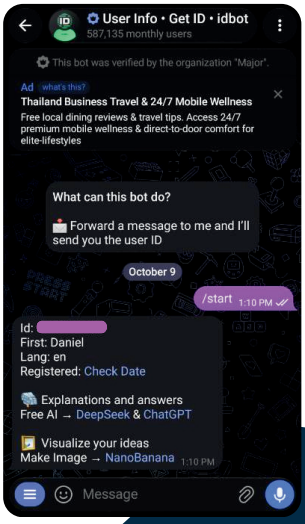

SHOUXINGCARE

LET'S CREATE THE BOT

Step 1: Create your Alert Bot (BotFather)

1. Open BotFather in Telegram and tap Start.
2. Type /newbot and send it.
3. Type a name for your bot (for example: Shouxing Care).
4. Type a username that ends in bot (for example: ShouxingCareBot).
5. Copy the Bot Token code sent by BotFather and paste it into the Telegram bot token box on your screen.

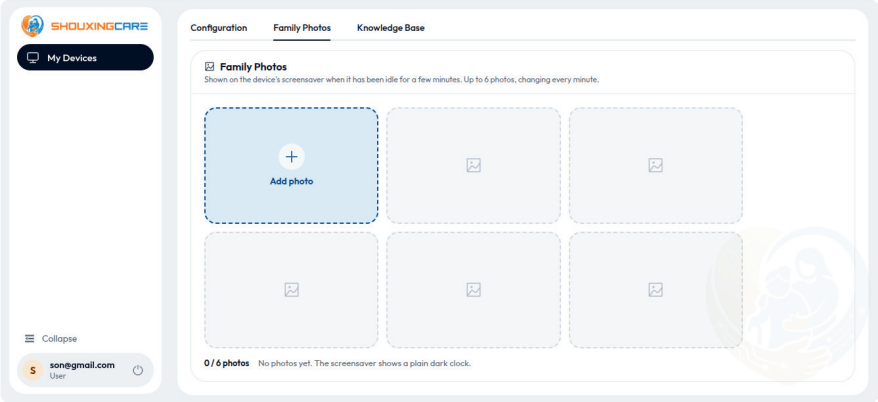

Step 2: Get your Chat ID (idbot)

1. Open @userinfobot in Telegram and tap Start.
2. Read your ID number sent back by the bot (listed next to Id:).
3. Copy this number and paste it into the Chat ID field on your setup screen so alerts get delivered directly to you.

FAMILY PHOTOS

Choose up to 6 family pictures for the screen. When the device stays quiet for a few minutes, it turns into a slideshow that rotates your photos every minute. Without photos, it displays a plain clock.

How to add family photos:

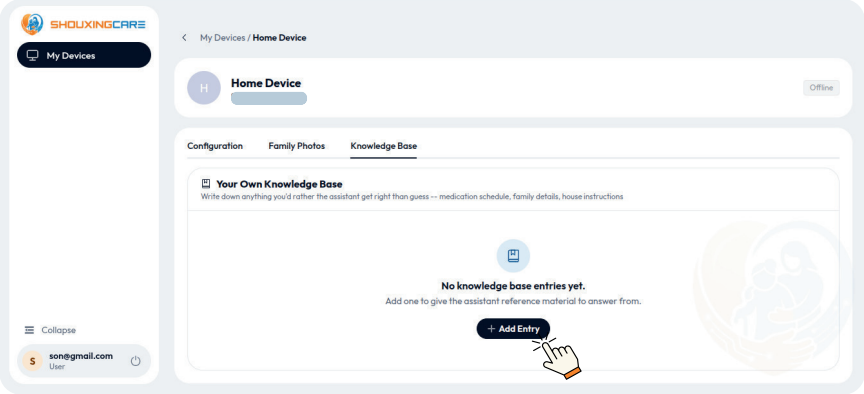

1. How to add family photos:
2. Click the "+" box to select a photo from the user's computer or phone.
3. The photo will upload automatically and appear in the collection right away.

Note: You can keep up to 6 photos at a time. Click the trash icon on any photo to remove or replace it.

SHOUXINGCARE

TELL THE AI ABOUT YOUR HABITS

Store essential care details so the assistant can answer accurately without guessing. Add notes on medication schedules, daily routines, family contacts, or household rules.

Knowledge Base

1. Click "+ Add Entry" to create a new note for the assistant.
2. Give it a clear Title (for example: Medication Schedule or Emergency Contacts).
3. Type the details in plain language—just like explaining it to a caregiver.
4. Save the entry so the assistant uses it when answering questions.
